zombie zords steam. zombie zords badge

Definitely too short. Storyline doesn't make much sense. Still, I had fun with the puzzles. And you get to fight Nazis, so that gave it an Indiana Jones vibe I enjoyed. Definitely buy it WAY on sale.. NO game tutorial, no explanation on objectives until you click stuff, not worth time needs more work, can not give a positive thumbs up, thumbs down all the way. This game shows how gameplay is king. So simple yet so creative and fun. Excited to see what the developer has in store for future titles. Gonna pick this up again on the switch to play in handheld!.. It's the worst escape room I've ever played.

I played the desktop version and my friend the RV version. In the desktop version, the hint system is broken and gives a hint for other part of the game.

Also, the graphics are too dark and the objects disappear behind walls or the floor

Not recommended.

Es la peor sala de escape que he jugado nunca.

Yo jugué la versión de escritorio y mi amigo la versión RV. En la versión de escritorio, el sistema de sugerencias están rotos y da una pista para otra parte del juego.

Además, los gráficos son demasiado oscuros y los objetos desaparecen detrás de las paredes o del suelo.

No es recomendable.

. It's unpolished and not what I expected but I ended up really liking the game and was even a little sad because I completed it.

The thing that makes this game stand out from other match-3 games that I've played is that you can move pieces diagonally.

There's also no timer for the main mode so it was fun to just chill out to my own music and enjoy the gentle brain tease.

---

I enjoyed it. Hard game.... Great extra in comparison of the Heroes 7 standard (Fortress faction, neutral units, artefacts, heroes, etc) I didnt encounter any bug. I had love if heroes 7 standard was that good from the start. I recommend this game.. Well, they completely remade DubWars from scratch again, so I'd better talk about this.

Ever since DubWars came out, I have been a huge fan and decided that this could be the coolest game ever if they execute it just right. Up until now, they haven't. They were forced to completely remake the game into something crappy and had a huge setback, but since they've rebuilt the game, I suppose I'd better talk about this update.

And it's MUCH BETTER. Almost a great game now, but definitely lacks some polish. They finally got the upgrades system going, but it's very confusing, since many of the icons look the same and have no description for them. And god, are you going to need these upgrades, because the gameplay itself has become very hard. Fortunately it's not impossible. The weapon designs and enemy designs are great and are put in very well according to the song, and it's pretty exhilarating, though takes a while to get used to.

They have a level system now, too. Every time you get to the end of a song, a new one is unlocked. The game starts off with easier levels first, which I like, but I'm a bit upset because it took me many levels to get to the Dubstep songs I so badly wanted to play, but with patience and practice, you are well rewarded.

So overall I feel like this game is going in a really good direction and I would recommend getting it on sale, but right now, \$20 is extremely steep.. Pretty cool game. if you liked the old school Dyna/Bombberman/etc. type of game, this takes that to a new level. Blow stuff up, avoid hazards, be quick and careful, win. The campaign isn't bad, but it's quickly over. The community maps provide an endless source of challenges, if you're willing to find the good maps among the tons of bad ones. The enemies are 100% predictable, in fact they work more like an automated security system rather than enemies. The map editor is easy to use, but it's very limited.

There are collectible things on the maps too, which I never cared about.

I got this through a humble bundle, and it was worth it, I've spent a lot of time playing the community maps. Now I'm kinda bored with it, but i still think it's a cool game.

. Well written plot, beautifully crafted characters and alternate history world

top notch voice acting!

My only gripe was that the ending was a little anticlimactic,

But its up there as one of my favourite point and click adventures of 2018!. The game is a little bit short but quite fun. It took me 6 hours to beat the game and I unlocked about half of the achievements doing so. Sadly the game does not allow you to continue your save file past beating the end boss. So you can't go back to get all the max health items if you missed them the first go around. Its very linear and does not allow for much back tracking at all.

The game isn't very difficult, bosses patterns are easily learned and sometimes completely avoidable. The only way to save your game is to game over at the last check point you used. This is annoying but you get use to it quickly. Game play is similar to Kid Icarus but gives a little more variety in weapons and attacks. The 7.99 price tag is a little bit high for how easy of a game it is. However, if you find it on sale definately pick it up.

I found binding the attack and hover abilities to the back buttons on the Steam Controller. I also rebound the Dpad to the analogue stick. If you have a Steam controller save yourself the time and use my template for it.

I found this game from the failed RETRO VGS indiegogo. I can say that it would not be worth paying \$25+ but it is a good game for around \$3-5.
